

MBIT & Biofacade NEWS

MBIT Newly renovated Biofacade on West corridor designed by Associate Professor Pasinee Sunakorn using PE covered wire banded and interlacing to imitate vine and branch of climbers , growing Thumbergia Grandiflora. Automated smog and drip irrigation will be installed. Water supply will be collected from toilet grey water, rainwater and Air Condition Units to be stored in treatment Tank before irrigation. It is now under construction and plan to finish at the same time as new office space by the beginning of next semester in June.
